■ CHARACTERISTICS :

Product code	Channel Width	Ø outlet Ds	Ø inlet De	Height mini/maxi H/h	Height outlet h1	Ø D	Ø d
PS100V	100	110	110	590/620	140	140	90
PS100X	100	125	110	590/620	140	140	90
PS150Z	150	160	160	590/620	175	200	140
PS200B	200	200	200	590/620	185	200	160
PS300E	300	315	315	590/620	230	400	250

■ IMPLEMENTATION :

The vertical outlet (supply) is to screw under the channel. Having unscrewed the grating, the body of the sump is linked on the vertical outlet. The sump with the channel is installed and the sump is linked on the pipe. Then, the sump is filling in the same concrete as the channel. The bucket is then introduced into the sump and turned by a quarter of tour to block it in position. The grating is put back in place and screwed.
